Neonatal Comfort: Analgesia, Sedation and Individualized Loving Care

OBJECTIVES

Though there is unique agreement on the noble goal of providing optimal comfort and care to neonates, great uncertainty exists within the scientific and practicing community of neonatologists and intensive care personnel in regard to the scientific basis, practical measures and evidence-based efficiency of interventions aimed at providing comfort, care and human dignity. In this seminar distinguished experts will offer insights into and solutions for these delicate and central problems in neonatology.
